Full stack developer with more than 4 years of professional experience working with software development.

■ SKILLS

- Frontend: HTML, CSS, Javascript, React, Next.js, Vue Tailwind CSS
- Backend: Django, Ruby on Rails, Node.js, Java Spring Boot
- Databases: PostgreSQL, MongoDB, Microsoft SQL Server
- Tools: Git, Docker, Heroku, AWS, Azure Dev Ops, Power BI
- OS: Linux
- E-commerce platforms: Vtex, Shopify

■ WORK EXPERIENCE

· **Senior Full Stack Developer | 08/2022 - present**

ExxonMobil – Houston/TX – United States

- Tech stack: Vue, Node.js, Microsoft SQL Server, ServiceNow, Tableau and Azure DevOps

At ExxonMobil, I currently work as a Senior Full Stack Developer in an international squad. Here we work in a project that consists of building high-performance dashboards with multiple integrations inside a web application with the goal of showing metrics and indicators to assist managers and employees in day-to-day and long term work. I also develop some other internal tools and dashboards using Tableau.

· **Full Stack Development Consultant | 08/2022 - 03/2023**

Savecash - São Paulo/SP – Brazil

- Tech stack: Angular, Java Spring Boot, Jest, JUnit, PostgreSQL, Docker, Redis, RabbitMQ, AWS

At Savecash, I worked as a consultant focused on full stack development. I helped to build the backend of the Savecash mobile app, and some portals that end-users and employees could use. After

the app was finished and launched, I chose to leave and focus on other ventures.

- **Lead Software Developer | 08/2021 - 08/2022**

Dynasty Global Investments – São Paulo/SP - Brazil

- Tech stack: React, Next.js, Django, Ruby on Rails, PostgreSQL, Power BI and Google Cloud Platform

At Dynasty Global Investments, I worked as the leader of the software development team. There we developed a digital investment platform, with deposit, withdrawal, transfer and staking functionalities for both fiat and crypto currencies. Along with this digital platform, I also worked developing the company's website and internal systems, such as dashboards to show KPIs of the company and assist managers and C-levels.

- **Software Development Lead | 04/2020 - 08/2021**

Jack Vartanian – São Paulo/SP - Brazil

- Tech stack: Python, HTML, CSS, Javascript, React, Node.js, Django, MongoDB, PostgreSQL, Docker, AWS, Heroku and Git

At Jack Vartanian, I started working as a web developer in Jan/2019, and in Apr/2020 we were able to build a software development team inside the company, with this I had the opportunity to lead multiple analysts and helped to develop the e-commerce website, with focus on implementing new features and adjustments to increase the conversion rate, as well as developing internal systems that assisted both salesmen and the company's office employees. At the end of 2020, while working at the jewelry e-commerce, I also had the opportunity of developing a new e-commerce focused on wines, achieving great results on both fronts.

- **Web Developer | 01/2019 - 03/2020**
